

LABOUNTY ATTACHMENTS

MOBILE SHEARS

LaBounty Mobile Shears are engineered to maximize performance, longevity and safety with significantly reduced maintenance time. LaBounty has mobile shears for scrap metal processing, demolition and road/bridge reconstruction, building demolition, and wood demolition and recycling.

The all new MSD SABER-LUBE SERIES. Shears use a simple, patent pending, automated lubrication delivery system to lube specific components of the shear resulting in increased production, less wear, and less maintenance.

UNIVERSAL PROCESSOR

LaBounty Universal Processors are designed to maximize the use of one attachment by using a variety of changeable jaw sets. With SIX JAW SETS to choose from one attachment can be used for concrete cracking, concrete pulverizing, scrap metal shearing, plate shearing, reinforced concrete processing, or wood shearing. Patented changeable LaBounty Swift Lock™ teeth are standard on most concrete pulverizer and concrete cracking and pulverizer Jaws.

GRAPPLES

HDR Grapples

HDR Grapples have a 2-tine upper jaw and 3-tine lower jaw.

7 HDR Grapple models are available for carriers from 25,000-180,000 lb (11,340-81,648 kg). They are used for waste handling, refuse, and large volumes of loose materials.

TW Grapples

TW Grapples have a 4-tine upper jaw and 5-tine lower jaw.

6 TW Grapple models are available for carriers from 25,000-180,000 lb (11,340-81,648 kg). They are used for waste handling, refuse, and large volumes of loose materials.

CONCRETE PULVIZERS

LaBounty Concrete Pulverizers are designed for quiet, controlled demolition and recycling of concrete structures. All Concrete Pulverizer models feature patented pin-on SWIFT LOCK™ teeth that allow field change-out in minutes. LaBounty Concrete Pulverizers are actuated by the excavator's bucket cylinder—no additional hydraulic circuits are required.
