Features and Benefits

The Stanley HG80 Horizontal Grinder is ideal for smoothing weld seams, de-burring drilled holes, cleaning castings, or any application where removal of unwanted metal is needed.

The HG80's hydraulic motor is specifically designed to optimize power and rpm for grinding applications. The HG80 won't bog down on those tough grinding jobs. And, its compact and lightweight design helps reduce operator fatigue.

A built-in flow control valve prevents the chance of excessive spindle speed and also protects the motor, resulting in increased tool life. An interlocking trigger assembly helps prevent accidental engagement of the tool, providing increased operator safety.
