LaBounty

MSD SABER SERIES

"I have owned and operated LaBounty shears for over 10 years and currently own 7 of them, along with many other LaBounty attachments. When I started using the new MSD 3000 Saber Series, I was amazed. It's got unbelievable power, it's fast, the operator has excellent visibility and maintenance has been drastically reduced with the bolt on Saber Tip. LaBounty has done it again. This shear is just awesome."

-Tom Petrizzo, Mill Metals - Jersey City, New Jersey

More Power: 10-15% over previous models, more than anyone else = more product produced at the end of the day

Dual Guide Slide Puck System = less jaw stress and less jamming.

Larger Pivot Components, fully wrapped, tapered end cap = better protection, better visibility.

LaBounty Built, Reversed, Large Bore, Forged Cylinder Rods with new seal design = longer seal life and capable of operating to 5500 PSI.

Spool Type Speed Valve = reliable, fast cycle times

Rotating Model shown - non-rotators easily convertible

The Original. The Best. Period.

Patented, Reversible Saber Tip = less maintenance, more uptime, less operating cost

Patented, Tapped Blade System = safer, easier removal & less maintenance
